

## Potential Learning Questions & Areas of Focus for Innovation

What challenging mental health issues within the cities of Pomona, Claremont and La Verne that could be addressed through an innovative approach?

If we knew we could successfully address a challenge, within 5 years, what learning question(s) would we propose as the focus of the Innovation project?

### Example #1:

**Issue:** Honoring and identifying more holistic approaches to well-being

**Learning Questions:**

1. What will help clinicians and other services providers become more open and receptive to holistic approaches to well-being?
2. What will help clinicians and other service providers become more able to link their clients to appropriate information and support for more holistic approaches to well-being?

### Example #2:

**Issue:** Connecting people receiving services to alternative community-based supports

**Learning Questions:**

1. How can services providers encourage people receiving services to connect with community-based supports that focus on their interest, passions, and strengths instead of their symptoms, illness, or diagnosis?
2. Does making these connections to community-based supports improve the experience of recovery and decrease the length of time and intensity of needed treatment?
