## What are the trends for ETS and NAMI 101

### FY 2018-19

- 18 NAMI 101
- 22 Ending the Silence

### FY 2019-20

- 4 NAMI 101
- 19 Ending the Silence

### FY 2020-21

- 12 NAMI 101
- 4 Ending the Silence \*

*\*As a result of COVID-19, 2020 ETS presentation numbers declined. This was attributed to the increase in requests being made from a more broad audience for mental health presentations, which NAMI 101 allowed us to accommodate.*

# Questions for NAMI?

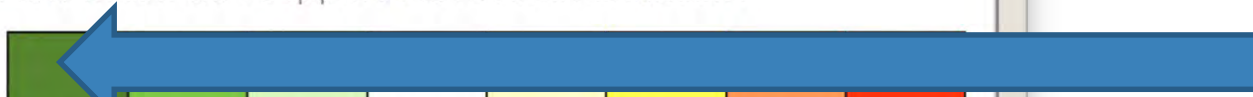

# Are we in agreement?

## Gradients of agreement

How much do I support the recommendation?

Endorse	Endorse with minor point of contention	Agree with some hesitation	Abstain	Stand aside	Disagree but will support the majority	Disagree and don't want to help implement	Can't go forward
<i>I like it.</i>	<i>Basically I like it.</i>	<i>I can live with it.</i>	<i>I have no opinion.</i>	<i>I don't like this, but I won't hold up the group.</i>	<i>I want my disagreement recorded, but I'll support the decision.</i>	<i>I won't stop anyone else, but I don't want to make this happen.</i>	<i>We have to continue working.</i>

## Capital Facilities and Technological Needs

**Jessica Wong**

Interim Chief Information Officer

presenters

# What is Capital Facilities and Technological Needs?

CFTN funds are used to acquire or renovate buildings that support MHPA programs.

Technology funds support the improvement of administrative systems as well as increasing consumer access to health information and records electronically.

# New Electronic Health Record (EHR) System

Who benefits from the new system and why?

**Every client or participant of Tri-City services will benefit!**

	# of Scheduled Appointments	# of Intakes
Average per Month	7,848	149

## The new EHR platform:

- Enables Tri-City to give patients/clients easier and more immediate access to their own medical records
- Allows for secure and streamlined communication between Tri-City and primary care providers and pharmacies
- Includes tools and workflows that will increase clinical efficiency, ultimately leading to more capacity to see clients

# New Electronic Health Record (EHR) System

## Why is this change needed?

The Office of the National Coordinator for Health Information Technology's (ONC) passed the Cures Act Final Rules in 2020

The Final Rules are:

- Intended to improve electronic health information (EHI) interoperability, meaning the ability for one provider's system to communicate information to another provider's system
- Make it easier for patients to access their own health records
- Intended to enhance patients' rights of access by promoting innovation in the healthcare technology industry so that information is delivered more conveniently to both patients and healthcare providers

Non-compliance is subject to penalties/fines of up to \$1,000,000

# Unite Us Referral Management Platform

## Who benefits from the new system and why?

- Tri-City works diligently to research and review services provided outside of the Tri-City system of care
- Hundreds of referrals are provided to clients/participants per year
- The manual nature of the current process limits the number of referrals Tri-City staff can provide
- The Unite Us platform pilot is intended to see if this electronic organized community network system can increase the number of persons served in regards to referrals and resources and whether or not use of the platform serves to create a more comprehensive and connected network of community partners that results in quicker and more responsive services for persons in need throughout the three cities

## Budget for Electronic Health Record and Referral Management Platform

	Electronic Health Record	Referral Management
Projected Funding	\$270,436	\$30,000
Expected Start Date	June 1, 2021	June 1, 2021
Expected Completion Date	June 1, 2022	September 30, 2021

Estimated Total for Both Projects: \$300,436\*

*\*All dates and costs are estimated and subject to revision upon completion*
